# JOINT COMPANY-UNION SAFETY COMMITTEE

November 9, 1994

To: [REDACTED]  
Analytical Labs  
Building 123  
Ext. [REDACTED]

From: C.W. Buchholz / D.D. Melton  
Joint Company/Union Safety Comm.  
Building T690G / Building T452B  
Ext. 5801 / Ext. 3057

SUBJECT: RESOLUTION OF SAFETY CONCERN 94-186

In response to your safety concern involving, AUTOMATIC PIPETTE, an investigation has been conducted.

A meeting was held on November 1, 1994 to discuss the subject safety concern. It was determined there are two automatic pipettes used in the required laboratory process. The first automatic pipette is a Natson Marlo 5014. This pipette is inoperative and management will not attempt to have it repaired. Instead management will seek to find a suitable replacement for this pipette. The second automatic pipette is a Nanostat Jr. This pipette is also inoperative and parts to repair it are on hand. Thomas J. Szydlowski (Analytical Lab Bldg 123) said repairs to this pipette are expected to be completed by November 11, 1994. During the interim period lab technicians will use a hand held pipette.

With the above stated actions, the JCUSC considers this safety concern resolved. Changes to this agreement cannot be made without concurrence by the JCUSC. If you have additional problems with this concern, the resolution, or the implementation of the corrective action, please contact the JCUSC. Thank you for participating in the safety concern process.
