SUBJECT: RESOLUTION OF SAFETY CONCERN 96-129 - RAD SURVEYS

The Joint Company/Union Safety Committee (JCUSC) has investigated the above referenced concern. The concern involves determining if equipment in Building 460 requires a radiological contamination survey for offsite shipment.

The investigators contacted J. Cisneros, Building 460 Radiological Engineering. According to Mr. Cisneros, items with a confirmed history of residing exclusively in Building 460 were exempt from radiological survey requirements. All other items, either known or suspected of coming from areas of possible radiological contamination, require radiological surveying before offsite shipment.

The JCUSC considers this concern adequately resolved. Changes to this agreement cannot be made without concurrence by the JCUSC. Thank you for your participation in the safety program. If you have any further questions or problems regarding this concern, please feel free to contact the JCUSC.
